

# NEW YORK STATE INDEPENDENT REDISTRICTING COMMISSION 

Final Redistricting Plan<br>Statement from NYIRC Chair Imamura and Commissioners Benger, Cuevas-Molina, Flateau, and Frazier Regarding Population Deviation in Proposed Senate and Assembly Districts Submitted to Legislature

The New York Constitution sets forth the principles that the Independent Redistricting Commission was required to follow in creating State Senate, State Assembly, and congressional districts. Among those principles, the Constitution states that "[t]o the extent practicable, districts shall contain as nearly as may be an equal number of inhabitants. For each district that deviates from this requirement, the commission shall provide a specific public explanation as to why such deviation exists."

The districts in this plan contain as nearly an equal number of inhabitants as practicable. Given the 2020 Census data, as amended for state legislative districts pursuant to N.Y. Legis. Law $\S 83-\mathrm{m}$, the ideal population of a congressional district is 776,971 ; the ideal population of a State Senate district is 320,537 ; and the ideal population of a State Assembly district is 134,626 .
Following is a table that lists all of the districts in this plan that deviate from the ideal.

The explanation for why such deviation exists is the Commission's duty to balance population equality against the other criteria the Commission is required to consider, including protection of racial or language minority voting rights; maintenance of cores of existing districts, of preexisting political subdivisions, including counties, cities, and towns, and of communities of interest; compactness; and contiguity. The Commission has additional obligations specific to Senate districts, including town-on-border, block-on-border, and limitations pertaining to counties, towns, and blocks. Overall, the congressional districts contain no more than a oneperson deviation, the Senate districts contain no more than a $1.38 \%$ deviation, and the Assembly districts contain no more than a 3.99\% deviation.

## SENATE

| District | Population | Deviation |
| :---: | :---: | :---: |
